SHOTGUN
- 1989 • OVER AND UNDER
SHOTGUN
- 1992 • INERTIA SYSTEM
SEMI AUTO SHOTGUN
- 1998 • 9x19mm
SEMI AUTO PISTOL
- 2000 • SEMI AUTO
SHOTGUN
- 2021 • SEMI AUTO
RIFLE

Arttech's history has started in the early beginning of 1940's by manufacturing single barrel shotguns, pistols and hand tools in a small village of Trabzon, at the Blacksea region of Turkey. In the leadership of Muzaffer Artkin, three brothers decided to move to İstanbul to carry out their production capabilities into a contemporary level in 1976. Mualfa company continued manufacturing single barrel shotguns and also manufactured investment casting gun parts for firearms manufacturers locally and internationally.

In the year of 1989 a new collaboration built up with the contribution of Mr. Celal Yollu, the legendary Vursan company which was the pioneer of innovations has been established. Vursan achieved many successes like manufacturing the first semi automatic shotgun of Turkey, supplying parts for military companies, manufacturing a 9 mm semi auto pistol in addition to many other international achievements in defense industry. In the year of 1999 Vursan has became partners with the Beretta Holding and in 2001 Artkin family has left this partnership and established Arttech Kalıp Sanayi Ticaret A.Ş. in 2002 for manufacturing standard and custom made mold bases.

Today, Arttech is one of the most wellknown mold base manufacturing companies of Europe and awarded as one of the first 1.000 processed metal exporters of Turkey according to IDDMIB (İstanbul Ferrous and Non-Ferrous Metals Exporters' Association). With the experience of decades and the modern manufacturing facilities of today, Arttech has decided to get back in defense industry once again by 2020. As a main part of its philosophy of being the pioneer in many fields, Arttech is now the first company in manufacturing Turkey's first semi auto, pump action and straight pull hunting rifles in various calibers. As an ISO certified company, with the management of the third generation of the family and the experience of decades on firearms manufacturing, Arttech is aiming to become the leader in its field using the contemporary industry instruments once again.

FOR THE GAME CHANGERS!

PRIMA

SIMPLE DURABLE RELIABLE

Prima is designed to feed the basic needs of a big game hunter.

Prima features reduced number of components, 3.250 gr of weight with 51cm barrel, crisp and short trigger, adjustable length of pull, easy release magazine, adjustable sights, various barrel lengths, DBS (detachable barrel system) and quick takedown advantage.

Ergonomic design allows hunters to easily customize the rifle with the accessories like optic and bipod picatinny rails, stock drop and cast adjustments shims which comes out of the box.

 ARTTECH

SUPERIOR PRIMA FEATURES

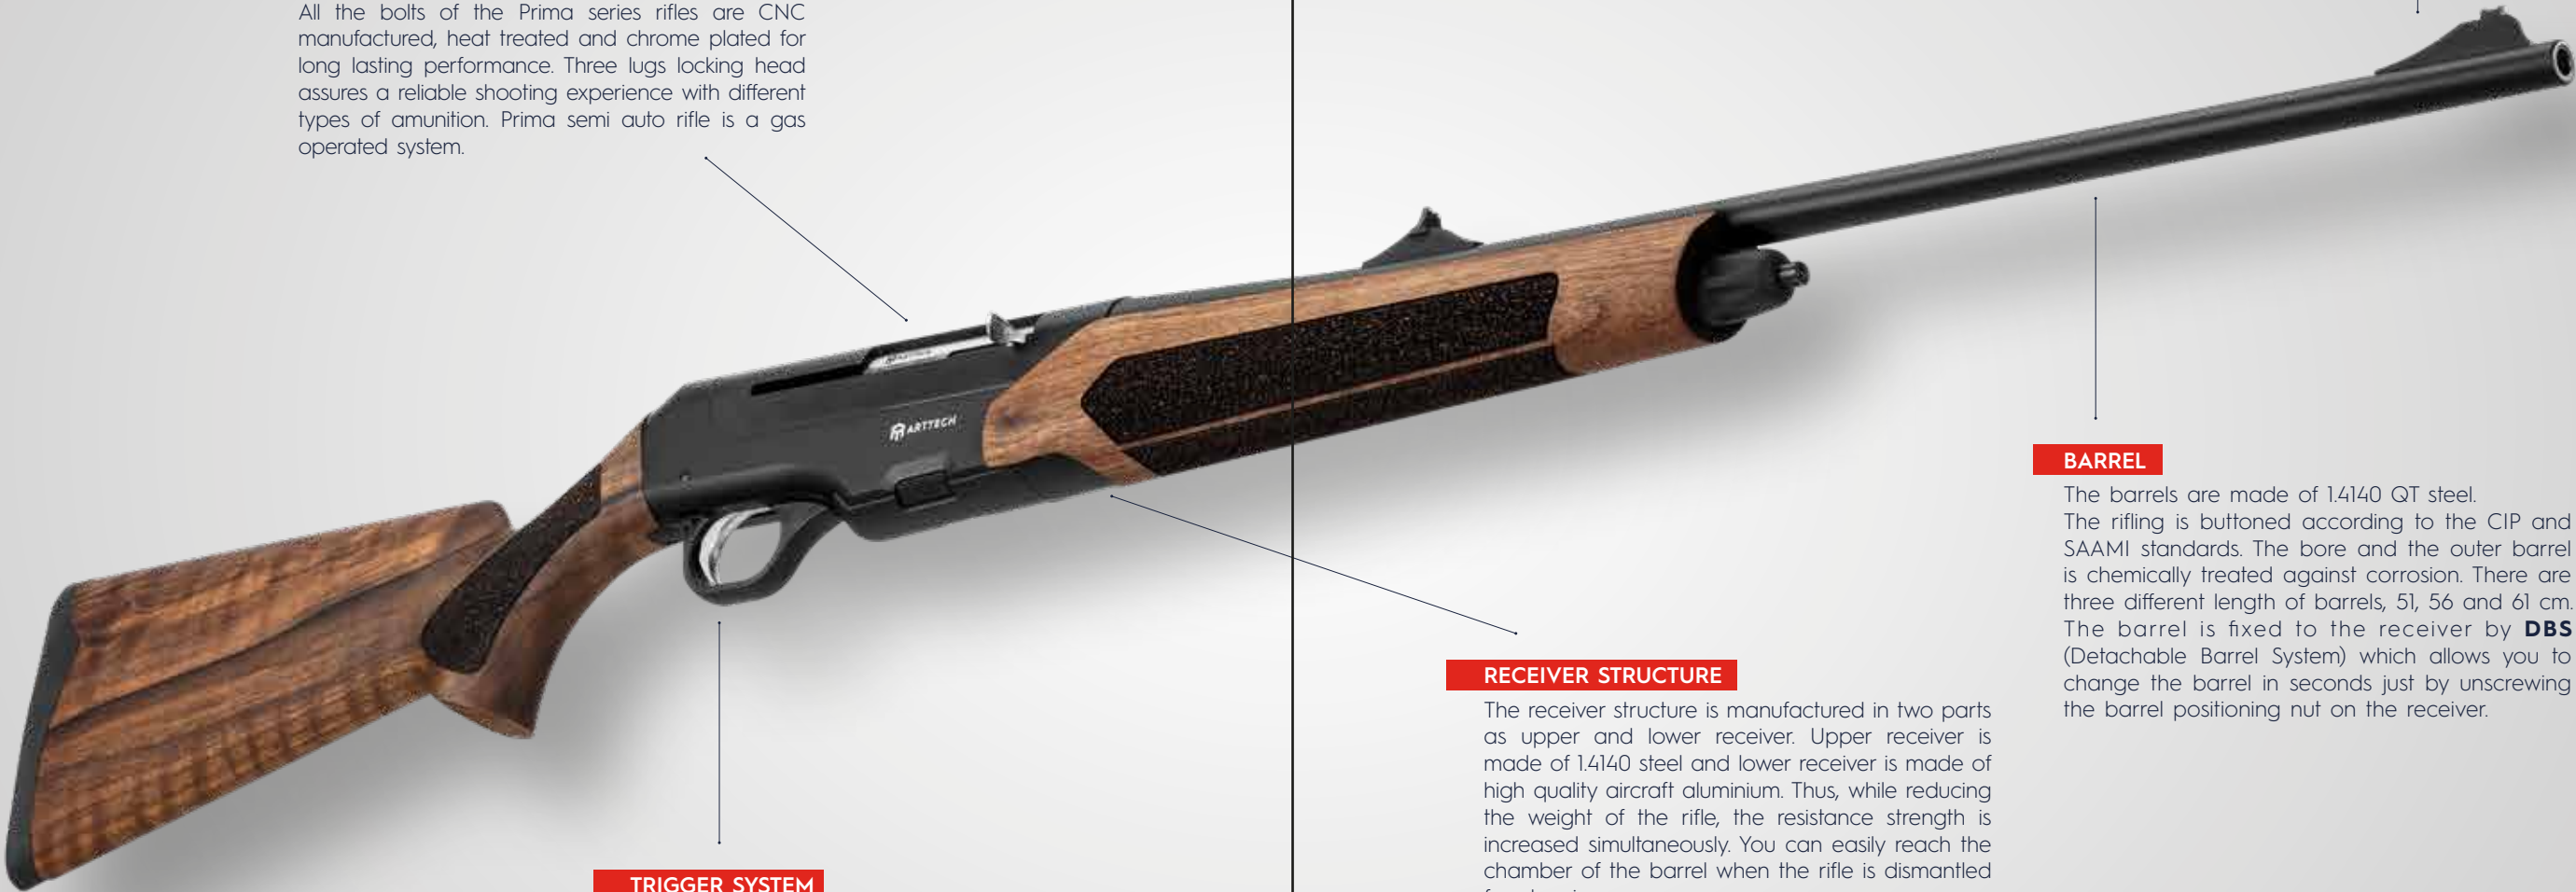

BOLT SYSTEM

All the bolts of the Prima series rifles are CNC manufactured, heat treated and chrome plated for long lasting performance. Three lugs locking head assures a reliable shooting experience with different types of amunition. Prima semi auto rifle is a gas operated system.

SIGHTS

The fiber optic sights are fully adjustable for elevation and windage. The windage is controlled on rear sight and the elevation is controlled on the front sight. The sights are made of steel and CNC machined. You can simply remove the sights just by loosening two screws when not needed.

BARREL

The barrels are made of 1.4140 QT steel. The rifling is buttoned according to the CIP and SAAMI standards. The bore and the outer barrel is chemically treated against corrosion. There are three different length of barrels, 51, 56 and 61 cm. The barrel is fixed to the receiver by **DBS** (Detachable Barrel System) which allows you to change the barrel in seconds just by unscrewing the barrel positioning nut on the receiver.

RECEIVER STRUCTURE

The receiver structure is manufactured in two parts as upper and lower receiver. Upper receiver is made of 1.4140 steel and lower receiver is made of high quality aircraft aluminium. Thus, while reducing the weight of the rifle, the resistance strength is increased simultaneously. You can easily reach the chamber of the barrel when the rifle is dismantled for cleaning purposes.

TRIGGER SYSTEM

Single trigger housing retaining pin gives you the advantage of easy dismantling of the receiver. Crisp trigger provides confidence in the longest shots. Reduced number of trigger group parts assures a smooth operating under every condition. The trigger guard is made of fiber reinforced polymer for the use of extreme conditions.

FOR THE EXTREME LOVERS!

PRIMA XP

S I M P L E D U R A B L E R E L I A B L E

Prima XP is the pump action rifle of Arttech for the hunters who likes to play hard. Prima XP is designed to operate reliably under every extreme condition. The slider cover under the forend protects the system against dust and mud entering during hunting.

Like the Prima version XP also allows quick take down and DBS barrel system.

Triangular shaped safety button ensures easy handling and reinforced polymer stocks adds strength to structure of the rifle.

Once you have it, you will never want to put it down again.

FOR THE HARD PLAYERS!

PRIMA SP

S I M P L E D U R A B L E R E L I A B L E

Prima SP is the straight pull rifle of Arttech,
for the hunters who likes to play hard.

Prima SP gives you the total control and allows you to
dominate the moment. SP gives you the advantage of fast and precise
repeating shots with its self closing bolt system by the bolt driver spring.

SP operating system is more than two times faster compared to a
classic bolt action maneuver system.
